

for over twenty years,now, i've traveled the continental US. in a semi truck. when xm radio became available, i couldn't wait to get one. for years the over the air broadcasters have given poor service, bad reception and less then acceptable program choices. i couldn't live without xm radio. now that xm is starting to take a bite out of the profits of fm, and am, which i think is the worst broadcast medium out there! please keep this in mind when giving your decision on local programing caried by xm radio.thank you . brian carr
